# FOREWORD

Labour force statistics are pivotal for manpower planning, human resource development and economic growth. Federal (currently, Pakistan) Bureau of Statistics has been conducting Labour Force Surveys (LFS) since 1963. The Survey's figures are extensively used by the government, researchers and other users at large.

LFS has been conducted on quarterly representative sample since 2005-06. For this purpose, the survey's total sample size is evenly distributed into four independent, quarterly representative sub-samples, each to be enumerated in a given quarter. It is the report on third quarter (Jan-March 2013) of the LFS 2012-13.

The report presents area/gender wise national/area level estimates on the main labour force indicators of employment and unemployment according to industry and occupation. The report is previewed with an account of the concepts & definitions and methodology to help understand the configuration of estimates.

Effort is made to produce this report as an informative and useful document for decision-makers, researchers, planners, economists and other beneficiaries at large. Suggestions will, however, be welcome for its further improvement.

> Asif Bajwa Chief Statistician

Pakistan Bureau of Statistics Statistics Division Government of Pakistan Islamabad May, 2013

# SUMMARY OF FINDINGS

The changes in the quarterly (Jan-Mar) estimates of LFS 2010-11 vis-à-vis the same period of 2012-13, are given as below in the *parenthesis* in the order of *previous* (2010-11) versus *current* (2012-13) period.

- i) **Participation rate** waxes a bit (32.0%, 32.1%). Similar configuration obtains in urban area (28.8%, 29.6%) and, for males (48.6%, 49.1%). Opposite changes are noted in rural areas (33.7%, 33.3%) and, for females (14.8%, 14.3%).
- ii) Activity status indicates decrease in informal sector (75.6%, 74.3%) and increase in formal (24.4%, 25.7%). However, females shares make opposite configuration, increase in the former (73.0%, 74.6%) and decrease in the latter (27.0%, 25.4%).
- iii) Employment Status Employed persons comprise employees (38.9%), own account workers (34.0%), contributing family workers (25.6%) and employers (1.5%). More females are engaged as contributing family workers (61.0%) while, more males are own account workers, employees and employers comparatively. Employees (35.6%, 38.9%) and employers (1.4%, 1.5%) gain steam while own account workers (35.6%, 34%) and contributing family workers (27.4%, 25.6%) trend down.
- iv) **Employment by major industry divisions** finds *Agriculture & allied activities* (44.2% 42.1%), *construction* (7.6%, 7.2%) and *wholesale & retail trade* (16.7%, 15.2%) trending down while, *manufacturing* (13.6%, 14.7%) and *other community/social & personal service activities* (10.8%, 13.8%) gaining steam. Generally, sex disaggregated indicators follow the movement of over all figures.
- v) **Mean Hours Worked** during reference week scale up marginally (46.3, 46.6). Gender disaggregated indicators follows similar configuration. Change by area make opposite configuration-increase in urban (51.1, 52.0) while decrease in rural areas (44.3, 44.2).
- vi) Unemployment rate increases (6.1%, 6.3%) during the comparative periods. Positive change in observed is rural areas (4.8%, 5.1%) and, for males (5.1%, 5.5%). Negative change is accrued in urban areas (9.1%, 8.8%) and, for females (9.4%, 9.2%).

#### **SECTION-I**

## METHODOLOGY

## Introduction

Labour Force Survey (LFS) has, more or less, been a regular activity of the Federal (currently, Pakistan) Bureau of Statistics (PBS) since 1963. As an ongoing process to keep abreast with emerging standards, the survey's questionnaire was revised in 1990. Major improvements constitute the addition of probing questions on marginal economic activities that tend to go unrecorded with conventional questions and, are carried out by women presumably. The questionnaire was further improved in 1995 to reckon with the size and composition of migration and informal sectors. The scope of the survey was extended in 2001-02 to occupational safety and health as well. The questionnaire was further articulated to conduct the 1<sup>st</sup> ever quarterly representative LFS 2005-06.

2. The current LFS 2012-13-31<sup>st</sup> one in the series-is the seventh one being carried out on quarterly basis. For this purpose, the total sample size is evenly distributed into four distinct sub-samples, each to be enumerated in a given quarter. The quarterly sample is designed to chalk up national level estimates of the main aggregates with rural-urban breakup.

#### **Objectives and Coverage**

3. The main aim of conducting LFS on quarterly basis is to provide lead assessment of a set of pivotal indicators of employment and literacy. It is pertinent to mention that quarterly estimates don't add up to annual estimates due to inter quarterly variation.

4. The survey covers all urban and rural areas of the four provinces of Pakistan defined as such by 1998 Population Census, excluding Federally Administered Tribal Areas (FATA) and military restricted areas.

#### **Field Operation**

5. PBS is the national statistical organization responsible for collection, processing, compilation and dissemination of statistics. It has 34 Regional/Field Offices located all over Pakistan. These offices are equipped and manned with regular and trained field staff for collection of data through censuses/surveys.

6. In order to evolve dynamics of field enumeration in line with the survey's objectives, training is imparted to the concerned staff on interviewing techniques and other procedure to be used in the enumeration. For quality control, supervisors from Regional/Field Offices and headquarter, make frequent field visits to spot-checking the collection process.

#### Data Processing and Editing

7. Soon after data collection, the supervisors clean, edit and check the filled in questionnaires manually for consistency and completeness and refer back to field where necessary.

8. Editing is done at headquarter by the subject matter section. Computer edit checks are applied to get even with errors identified at the stage of data entry. The relevant numerical techniques are used to eliminate erroneous data resulting from mistakes made during coding. The survey records are further edited and rectified through a series of computer processing stages.

9. *Sampling Frame:* Pakistan Bureau of Statistics (PBS) has developed its own sampling frame for urban areas. Each city/town is divided into a number of enumeration blocks. Each enumeration block is based on 200 to 250 households on the average with well-defined boundaries and maps. The list of enumeration blocks as updated through Economic Census 2003 and the list of villages/mouzas/dehs of 1998 Population Census have been taken as sampling frame. Enumeration blocks and villages are considered as Primary Sampling Units (PSUs) from urban and rural domains respectively.

#### Stratification Plan

10. *Urban Domain:* Karachi, Lahore, Gujranwala, Faisalabad, Rawalpindi, Multan, Sialkot, Sargodha, Bahawalpur, Hyderabad, Sukkur, Peshawar, Quetta and Islamabad are considered as large cities. Each of these cities constitutes a separate stratum, further sub-stratified according to low, middle and high income groups based on the information collected in respect of each enumeration block at the time of demarcation/ updating of urban area sampling frame.

11. *Remaining Urban Areas*: After excluding the population of large cities from the population of respective ex-administrative division, the remaining urban population of exadministrative division from provinces is grouped together to form another stratum called other urban. Thus each ex-division in remaining urban areas in the four provinces constitutes a stratum.

12. *Rural Domain:* Each administrative district in the Punjab, Sindh and Khyber Pakhtunkhwa is considered an independent stratum whereas in Balochistan, each ex-administrative division constitutes a stratum.

13. *Universe:* The universe for LFS consists of all urban and rural areas of the four provinces of Pakistan defined as such by 1998 Population Census.

## Sample Design

14. *Procedure:* A stratified two-stage sample design is adopted for the survey.

15. Selection of primary sampling units (PSUs): Enumeration blocks in urban domain and mouzas/dehs/villages in rural are taken as Primary Sampling Units (PSUs). In the urban domain, sample PSUs from each ultimate stratum/sub-stratum have been selected with probability proportional to size (PPS) method of sampling scheme. In urban domain, the number of households in an enumeration block as updated through Economic Census and in rural domain, population of 1998 Census for each village/moza/deh is considered as measure of size.

16. *Selection of secondary sampling units (SSUs):* The constituent households of sample PSUs are taken as Secondary Sampling Units (SSUs). A specified number of households i.e. 12 from each urban sample PSU, 16 from rural sample PSU have been selected with equal probability using systematic sampling technique with a random start.

17. *Sample Size and Its Allocation:* Methodologically, a sample of 8856 households is considered appropriate to provide reliable estimates of key labour force characteristics. The entire sample of households (SSUs) is drawn from 636 Primary Sampling Units (PSUs) out of which 330 are urban and 306 are rural. As urban population is more heterogeneous therefore, a higher proportion of sample size is allocated to urban domain. As a means to get reliable estimates, a

higher proportion of sample is assigned to Khyber Pakhtunkhwa and Balochistan in consideration to their smallness. After fixing the sample size at provincial level, further distribution of sample PSUs to different strata in rural and urban domains in each province is made proportionately. The distribution of sample PSUs and SSUs in the urban and rural domain of the four provinces is as under : -

Province/Area	Enumeration 1	Sample	Households	s (SSUs)		
	Rural	Urban	Total	Rural	Urban	Total
Punjab	123	132	225	1968	1584	3552
Sindh	70	102	172	1120	1224	2344
Khyber Pakhtunkhwa	68	51	119	1088	612	1700
Balochistan	45	45	90	720	540	1260
Pakistan	306	330	636	4896	3960	8856

#### SAMPLE SIZE AND ITS ALLOCATION

(Nos.)

#### **Reliability of Estimate**

18. Notwithstanding complete observance of the requisite codes to ensure reliability of data, co-efficient of variations, computed in the backdrop of 5% margin of error exercised for determining sample size, are also given below to affirm the reliability of estimates.

COEFFICIENT OF VARIATION (CVS) OF INITORIANT VARIABLES						
Characteristics	Coefficient of Variation (Cvs) in Percentage					
Total Persons	1.13					
Employed Persons	2.20					
Employed Persons by Formal Sector	5.84					
Employed Persons by Informal Sector	3.48					
Literacy Rate	2.16					
Household Size	1.12					
Sex Ratio	1.26					

#### **COEFFICIENT OF VARIATION (CVs) OF IMPORTANT VARIABLES**

#### Method of Data Collection

19. Data are collected by direct interview method. Generally, the head of household is chosen to provide information about all members of the household. In case of his non-availability at the time of interview, some other informed member of the household down the line is interviewed. The total sample for the year is evenly distributed for enumeration on quarterly basis to offset the effect of seasonal variations. The information collected however relates to the week preceding the date of enumeration.

#### Coverage

20. The survey covers all urban and rural areas of the four provinces of Pakistan defined as such by 1998 Population Census, excluding Federally Administered Tribal Areas (FATA) and military restricted areas. The population of excluded areas constitutes about 2% of the total population.

21. All enumeration Blocks in urban areas and mouzas/dehs/villages in rural areas were enumerated. The number of sample households 8800 (99.4% of the total sample) enumerated is less than the estimated sample size 8856 due to non contact and refusal cases in urban and rural areas.

## SECTION-II

## **CONCEPTS AND DEFINITIONS**

A brief explanation of the key concepts and definitions follows.

1. *Reference Period* is a week preceding the date of interview

2. *Literate* is a ten plus aged person who declares he could read and write in any language with understanding.

3. *Literacy rate* relates to the number of literate persons expressed as a percentage of the population ten years and above.

4. *Household* constitutes all those persons who usually live together and share their meals. A household may consist of one person or more who may or may not be related to each other.

5. *Migration* means movement of people from one administrative district to another administrative district at any time of their lives. It excludes movement of population within the current district.

6. *Economically Active Population* comprises all persons of either sex who provide labour services for the production of goods and services as defined by the United Nation System of National Accounts, during a specific reference period. According to this definition, the production of goods and services includes:

- i) all production and processing of primary products whether for the market, barter or, own consumption,
- ii) the production of all other goods and services for the market,
- iii) the households which produce such goods and services for the market and own consumption, and
- iv) own account construction

7. *Currently Active Population* or the labour force comprises all ten plus aged persons who fulfill the requirements for including among employed or unemployed during the reference period.

8. *Crude activity rate* is the currently active population expressed as a percentage of the total population in Pakistan.

9. *Refined activity rate* is the currently active population expressed as a percentage of the ten plus aged population. This rate enables international comparison by factoring in the effect of age composition.

10. *Employment* comprises all ten plus aged persons who worked at least one hour during the reference period and were either paid *employed* or *self employed*. Persons employed on permanent/regular footings, who have not worked for any reason during the reference period are also treated as employed, regardless of the duration of the absence or whether workers continued to receive a salary during the absence. The survey obtains information on the duration of absence as well as on other formal job attachment characteristics of workers in paid and self employment. In line with augmented participation rates, a loose upper bound of employment can be drawn up by including the persons engaged in marginal economic activities.

11. *Occupation* means the type of work done during the reference period by the persons employed (or the kind of work done previously if unemployed), irrespective of the industry or the status in employment of the person. It provides description of a person's job. Occupation is classified according to the Pakistan Standard Classification of Occupations based on the International Standard Classification of Occupations, ISCO-2008.

12. *Industry* means the activity of the firm, office, establishment or department in which a person is employed or the kind of business, which he/she operates. The activity is defined in terms of the kind of goods produced or services supplied by the unit in which the person works. Industry is classified according to a Pakistan Standard Classification of Industries used for national accounts and developed in 2010 (Rev-4) on the basis of the International Standard Industrial Classification, ISIC, Rev-4 released by United Nations in 2008.

13. *Self-employment job* is a job where remuneration is directly dependent upon the profits, or the potential profits, derived from the goods and services produced.

14. *Status in Employment* refers to the type of explicit or implicit contract of employment of the person with other persons or organizations. Status of an economically active individual with respect to his employment i.e. whether he/she is an employer, own account worker, employee or contributing family worker is defined as follows:

15. *Employee* is a person who works for a public or private employer and receives remuneration in wages, salary, commission, tips, piece rates or pay in kind. Employees are divided into

- *Regular paid employees with fixed wage*
- Casual paid employee
- Paid worker by piece rate or work performed
- Paid non-family apprentice

16. *Employer* is a person working during the reference period, on own-account or with one or a few partners at a "self-employment job" with one or more employees engaged on a continuous basis.

17. *Own account worker* is a person working during the reference period, on own-account or with one or more partners at a "self-employment job", without any employee engaged on a continuous basis; but, possibly, with one or more contributing family workers or employees engaged on an occasional basis. It includes owner cultivator, share cropper and contract cultivator.

18. *Contributing family worker* is a person who works without pay in cash or in kind on an enterprise operated by a member of his/her household or other related persons is termed as contributing family worker.

19. *Unemployment* comprises all ten plus aged persons who during the reference period were:

- i) "Without work" i.e. were not in paid-employment or self-employment; and
- ii) **"Currently available for work"** i.e. were available for paid employment or selfemployment; or
- iii) **"Not currently available"** for the following reasons: illness, will take a job within a month, is temporarily laid off, is an apprentice and is not willing to work; or
- iv) **"Seeking work"** i.e. had taken specific steps in a reference period to seek paid employment or self employment.

20. *Unemployment rate* is the unemployed population expressed as a percentage of the currently active population.

#### SECTION- III

## **Salient Features**

The third quarterly estimates are based on the data of 8800 sample households enumerated through Jan-Mar 2013. Findings are presented in the form of proportions and percentages to provide for all-purpose employability. For absolute numbers, one may refer to the population of Pakistan as per Planning & Development Division projection, estimated at 182.18 million on 16<sup>th</sup> February, 2013. A brief account of the survey's third quarter's estimates in comparison with that of the same period of LFS 2010-11 follows, parenthesized in the order of previous (2010-11) versus current (2012-13).

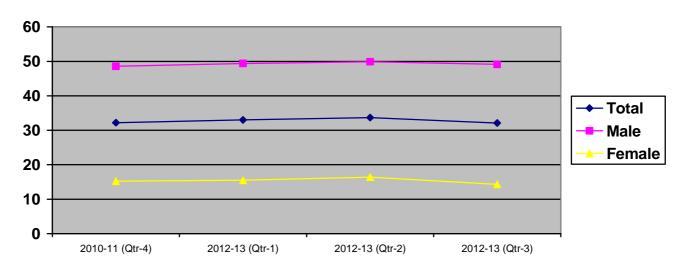

#### Labour Force Participation Rates

2. Labour force participation rate waxes a bit (32.0%, 32.1%). Similar configuration obtains in urban area (28.8%, 29.6%) and, for males (48.6%, 49.1%). Opposite changes are noted in rural areas (33.7%, 33.3%) and, for females (14.8%, 14.3%). The pertinent information is contained in the table-1 below.

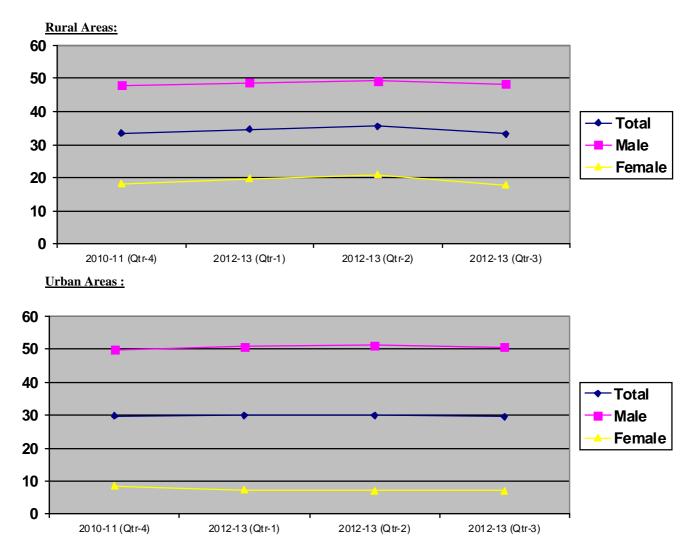

TABLE-1 CRUDE ACTIVITY (PARTICIPATION) RATES-PAKISTAN AND ITS RURAL-URBAN

						(%)
			3 <sup>rd</sup> Qu	arter		
Area	Ι	FS 2010-1	1	L	13	
	Total	Male	Female	Total	Male	Female
Pakistan	32.0	48.6	14.8	32.1	49.1	14.3
Rural	33.7	48.2	18.5	33.3	48.3	17.8
Urban	28.8	49.3	7.3	29.6	50.6	7.2

Figure 1 : CRUDE ACTIVITY(PARTICIPATION) RATES BY SEX FOR PAKISTAN, RURAL & URBAN

#### Activity Status

3. Batter part of non agricultural employment is informal. Informal sector wanes (75.6%, 74.3%) while formal waxes (24.4%, 25.7%) by area and, for males. However, females shares indicate a sort of opposite changes; decrease in the former while increase in the latter.

TABLE-2
FORMAL/INFORMAL SECTOR BY AREA AND SEX

						(%)
	3 <sup>rd</sup> Quarter					
Area		LFS 2010-11	l	LFS 2012-13		
	Total	Male	Female	Total	Male	Female
Total	100.0	100.0	100.0	100.0	100.0	100.0

Informal	79.3	79.0	81.8	78.6	78.3	81.8
Urban	100.0	100.0	100.0	100.0	100.0	100.0
Formal	28.2	27.3	36.9	29.9	29.6	33.3
Informal	71.8	72.7	63.1	70.1	70.4	66.7

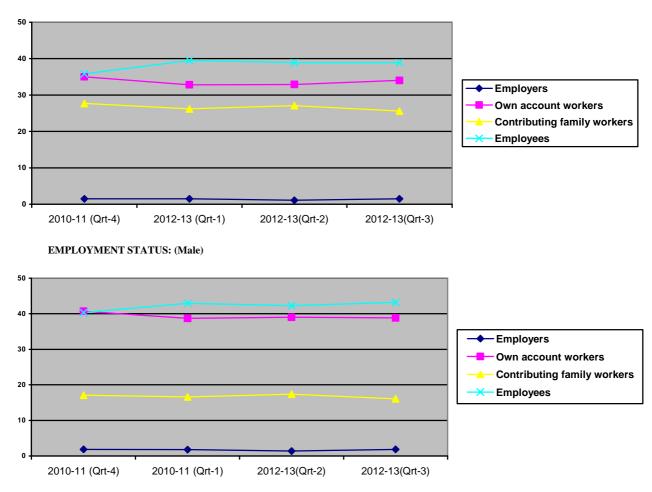

#### **Employed: Employment Status**

4. Employed persons comprise *employees* (38.9%), *own account workers* (34.0%), *contributing family workers* (25.6%) and *employers* (1.5%). More females are engaged as *contributing family workers* (61%) while, more males are *own account workers, employees* and *employers* comparatively. As for change during the comparative period, *employees* (35.6%, 38.9%) and *employers* (1.4%, 1.5%) gain steam while *own account workers*(35.6%, 34%) and *contributing family workers* (27.4%, 25.6%) trend down.

population ten years and above.

4. Householdconstitutes all those persons who usually live together and share their meals. A household may consist of one person or more who may or may not be related to each other.

5. Migration means movement of people from one administrative district to another administrative district at any time of their lives. It excludes movement of population within the current district.

6. Economically Active Population comprises all persons of either sex who provide labour services for the production of goods and services as defined by the United Nation System of National Accounts, during a specific reference period. According to this definition, the production of goods and services includes:

- i) all production and processing of primary products whether for the market, barter or, own consumption,
- ii) the production of all other goods and services for the market,
- iii) the households which produce such goods and services for the market and own consumption, and
- iv) own account construction

7. Currently Active Population or the labour force comprises all ten plus aged persons who fulfill the requirements for including among employed or unemployed during the reference period.

8. **Crude activity rate** is the currently active population expressed as a percentage of the total population in Pakistan.

9. **Refined activity rate** is the currently active population expressed as a percentage of the ten plus aged population. This rate enables international comparison by factoring in the effect of age composition.

classified according to the Pakistan Standard Classification of Occupations based on the International Standard Classification of Occupations, ISCO-2008.

12. Industry means the activity of the firm, office, establishment or department in which a person is employed or the kind of business, which he/she operates. The activity is defined in terms of the kind of goods produced or services supplied by the unit in which the person works. Industry is classified according to a Pakistan Standard Classification of Industries used for national accounts and developed in 2010 (Rev-4) on the basis of the International Standard Industrial Classification, ISIC, Rev-4 released by United Nations in 2008.

13. Self-employment jobs a job where remuneration is directly dependent upon the profits, or the potential profits, derived from the goods and services produced.

14. Status in Employmentefers to the type of explicit or implicit contract of employment of the person with other persons or organizations. Status of an economically active individual with respect to his employment i.e. whether he/she is an employer, own account worker, employee or contributing family worker is defined as follows:

15. Employee is a person who works for a public or private employer and receives remuneration in wages, salary, commission, tips, piece rates or pay in kind. Employees are divided into

- · Regular paid employees with fixed wage
- · Casual paid employee
- Paid worker by piece rate or work performed
- Paid non-family apprentice

16. Employer is a person working during the reference period, on own-account or with one or a few partners at a "self-employment job" with one or more employees engaged on a continuous basis.

17. Own account workers a person working during the reference period, on own-account or with one or more partners at a "self-employment job", without any employee engaged on a continuous basis; but, possibly, with one or more contributing family workers or employees engaged on an occasional basis. It includes owner cultivator, share cropper and contract cultivator.
