FOREWORD

A robust social sector - situating the state of education, health, income and employment from the perspective of universal access, adequacy, service delivery and efficiency – is sine qua non to usher in an equitable, holistic and sustainable process of economic development.

Further, the globalization and, by the same token, universalization of democratic ethos have progressively been bringing the development of social sector into sharp focus from the stand point of the efficiency of resource allocation. Thus, the investment in human resources is being increasingly recognized as the foremost imperative to instituting good governance and participative process of socio-economic development with distributive justice.

“Social Indicators of Pakistan” is an attempt to put a figure on the socio-economic configuration of the country on the basis of secondary data, in order to help evaluate, and brace up for, the unfolding scenario from an eclectic perspective. Notwithstanding some para analytical work, the document is essentially empirical in the content and the task of sounding the underlying realties out is left to savvy users of data and statistics.

It is hoped that this report will provide useful prelude to the pursuits of policy makers, social scientists and researchers. Suggestions to improve the content and coverage of the future updates of this publication are however welcome with appreciation.

ASIF BAJWA
Chief Statistician

Government of Pakistan
Pakistan Bureau of Statistics
Islamabad
November 2016

PREFACE

This is seventh report in the series on "Social Indicators of Pakistan". The first report was published in 1985 and subsequently it was published in 1990, 1995, 2003, 2007 and 2011. The report covers a wide range of socio-economic data viz population, income and expenditure, labour force and employment, education, health, family life and leisure, public safety, transport and communication. Mostly, the data are at the national level. In addition, international comparison on some key variables has also been provided. However, certain tabulation viz. singulate mean age, no of children ever born, infant mortality rate etc. derived from population census or Pakistan Demographic Survey (PDS) cannot be updated due to absence of latest survey.

Arguably, social indicators, with expanding remit due to rising emphasis on the human resource development in the new paradigm of economic development, are hard to be covered exhaustively. This notwithstanding, every effort has been made to include the latest available data from the censuses, surveys and the secondary sources published in the annual/adhoc reports of various organizations.

I seize this opportunity to acknowledge the debt of gratitude owed to our worthy respondents of data both in public and in private sector. I would also like to appreciate the staff of Social Statistics Section for their untiring efforts towards compiling this document and hope that the users of PBS data will find this document useful for their varied inquests.

ISMAIL KHAN
Deputy Director General

Government of Pakistan
Pakistan Bureau of Statistics
Islamabad
November 2016

GENESIS OF THE REPORTS

The compilation of Social Indicators of Pakistan 2016 owes to the efforts of the following staff of the Pakistan Bureau of Statistics.

Mr. Ismail Khan, Deputy Director General

Mr. Ghulam Muhammad, Director

Mr. Arshad Mahmood, Chief Statistical Officer

Miss. Shahnaz Akhtar, Statistical Officer

Mrs. Zahida Parveen, Statistical Officer

Mr. Shabbir Ali, Steno Typist

Mr. Muhammad Azhar, Statistical Assistant

Mr. Muhammad Bukhsh, Statistical Assistant

Mr. Muhammad Iqbal, Statistical Assistant

Mrs. Sakina Malik, Statistical Assistant

Mr. Muhammad Munir, Statistical Assistant

NOTES:

Household obtaining water from the source indicated expressed as a percentage of the total number of households. Categories: "Tap water" consists of both tap water inside and outside the house; "Hand pump" includes hand-pumps both inside and outside. Motor pump includes motor pump and tube well outside the house; "Dug well" includes well open and well closed both inside and outside the house; and "Other" includes public standpipe (supplied by tanker), water seller, canal, river, spring, stream, pond and other.

Totals may not add to 100 because of rounding.

NOTES:

Households having the type of water delivery system indicated, expressed as a percentage of the total number of households.

Local Government includes Public Health Engineering Department, LG&RDD, Municipality/District/Union Councils etc.; "Non-Government" includes community, NGO, private etc.

Categories: "Tap water" consist of both tap water inside and outside the house; "Hand pump/M. pump" includes hand-pumps both inside and outside, motor pump and tube well outside the house; "Dug well" includes well open and well closed both inside and outside the house; 'River/Canal /Stream" includes canal, river, spring, stream, pond and "Other" includes public standpipe (supplied by tanker), water seller and other.

Totals for columns may not add up to 100 because of rounding.

(*) It is to inform that PTV has shifted from station wise analyses to channel wise analyses, as all the stations (i.e. Peshawar, Home, News, Lahore, Karachi and Quetta) are working for all the channels (i.e. Home, News, Sports, World, Bolan and National). Therefore station wise analyses are not available.

....= data not available at cutoff date, Lao PDR = Lao People's Democratic Republic.

For Australia; Japan; the Republic of Korea; Kyrgyz Republic; Taipei, China; and Viet Nam, data refer to international visitor arrivals at frontiers (including tourists and same-day visitors). For the rest of the economies, data refer to international tourist arrivals at frontiers (excluding same-day visitors).

For reporting economies only.

....= data not available at cutoff date, 0.0 = magnitude is less than half of unit employed, — = magnitude equals zero, kWh = kilowatt-hour, Lao PDR = Lao People's Democratic Republic.

a Computed as residual that includes combustible renewables and waste; and generation by nuclear power, geothermal, solar, wind, and tide and wave energy. Sources: International Energy Agency; economy sources for Afghanistan; Bhutan; the Lao PDR; the Maldives; and the Pacific economies.

FORMULA

1. Population Density = $\frac{\text{Population}}{\text{Area}} \times 100$
2. Sex Ratio = $\frac{\text{Male Population}}{\text{Female Population}} \times 100$
3. Total Dependency Ratio= $\frac{\text{Population under 15 years} + \text{Population 65 years and over}}{\text{Population 15 to 64 years}} \times 100$
4. Child Dependency Ratio= $\frac{\text{Population under 15 years}}{\text{Population 15 to 64 years}} \times 100$
5. Old Dependency Ratio = $\frac{\text{Population 65 years and over}}{\text{Population 15 to 64 years}} \times 100$
6. Index of Aging = $\frac{\text{Population 65 years and over}}{\text{Population under 15 years}} \times 100$
7. Ratio of Child-bearing women = $\frac{\text{Women aged 15-49 years}}{\text{Total Female Population}} \times 100$
8. Rural-Urban Ratio (Income) = $\frac{\text{Household's average monthly income of rural area}}{\text{Household's average monthly income of urban area}} \times 100$
8. Crude Activity Rate = $\frac{\text{Civilian Labour Force (10 years & over)}}{\text{Total Population}} \times 100$
9. Refine Activity Rate = $\frac{\text{Civilian Labour Force (10 years & over)}}{\text{Population (10 years and over)}} \times 100$
10. Unemployment Rate = $\frac{\text{Unemployed Person 10 years & above}}{\text{Economically Active Population (10 years & above)}} \times 100$
12. Literacy Rate = $\frac{\text{Number of Literate (10 years & over)}}{\text{Population (10 years and over)}} \times 100$
13. Proportion Never Married Population = $\frac{\text{Never Married Population in the age group}}{\text{Total population in the age group}} \times 100$
14. Quintiles= Ranges of Per Capita Consumption Expenditure
